

## Country-Specific Age-Health Patterns: Options for Achieving Sustainable Prosperity

### Conclusions / findings:

- Lots of figures available (knowledge is there about the different demographics in Europe).
- Not homogeneous picture: need to look at each country (in Europe)
- Gap in the work force in EU-15 of about 7 Mio.
- Health is a pre-requisite to keep people longer in the jobs, or to get them back to work
- Prevention is key, big potential, could be a win-win for businesses
